### General information

Body      Convertible

Transmission      Manual

Gears      4

### Features

Heat

Radio

### Description

1972 Porsche 914 1.7/Experience a real blast from the past. Porsche's first mass produced mid-engine 4 cylinder created in conjunction with VW for

almost all modified as they made great street and track racers; performance enhancements were readily available and just about everyone made them. This example is about as close to original as you can get including the controversial "tail shifter" transmission. Raw, noisy exhaust, basic and a blast to drive, especially on a nice day with the targa top off. A true nimble mid-engine roadster that will make you appreciate how far "refined" affordable sports cars have evolved over almost 50 years, and this is the one that started it all. Plus, "Thumbs up" all over the place. Rent at \$138- per day. Multiple day discounts available.
